## Manifold Solenoid Valve

Introducing the Bermad Manifold Solenoid Valve. This innovative valve has unique flow through/bottom outlet configuration.

### The Bermad Manifold Solenoid

Valve's configuration allows a series of valves to be installed on a common lateral manifold thereby:-

- Reducing valve assembly sizes and therefore fittings and enclosure costs
- Reducing installation times

### Technical information

- Operating pressure range: 0.7 to 10 Bar
- Flow rates: 33 to 165 litres per hour
- Typical head loss: 0.5 metres per valve

Catalogue no	Description
32L05-24-AC	1" Manifold Solenoid Valve with 24VAC coil

## Manifold Filter Valves

Introducing the unique and innovative Bermad Manifold Filter Valve.

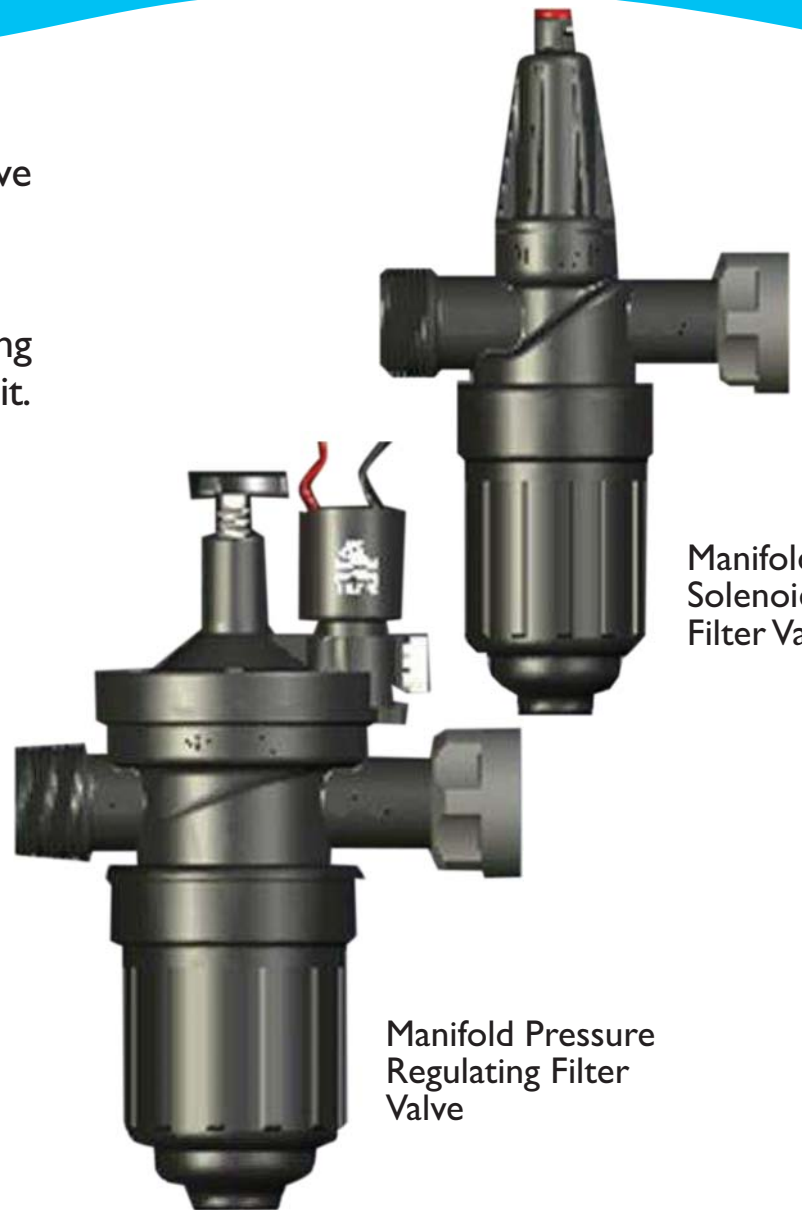

This new valve combines either a solenoid valve or a pressure regulating valve with a screen filter in a single unit.

### The Bermad Manifold Filter Valve

- Allows more compact valve assemblies reducing the size of valve enclosures

#### Technical information

- Operating pressure range:  
0.7 to 10 Bar
- Flow rates:  
33 to 165 litres per minute
- Filter:  
120 mesh
- Pressure regulation:  
1.4 or 2.5 Bar

Manifold Solenoid Filter Valve

Manifold Pressure Regulating Filter Valve

Catalogue no	Description
32L10-24-AC	1" Manifold Solenoid Valve c/w with Filter and 24VAC coil
32L15-14	1" Manifold 1.4 Bar Pressure Regulating Valve c/w Filter
32L15-25	1" 2.5 Bar Pressure Regulating Valve c/w Filter
