HYDROVAR AND TEKNOSPEED

The single-phase Hydrovar Water-cooled and Teknospeed variable speed electric pumps are designed for residential applications as they provide all the comfort and advantages of constant pressure in the home. The Teknospeed series comprises a frequency converter integrated into the pump which adjusts motor speed so as to constantly provide users with the same pressure, even when demand for water changes.

Ideal for use in greenhouses and stock watering, very economical to run. The range has a large number of models and pump types:

- Horizontal pumps: HVW/HMZ, HVW/BG, HVW/CEA-CA
- Horizontal and vertical pumps: TKS/HMZ, TKS/BG, TKS/CEA-CA, TK/SV.
- Single pump or two-pump pressure booster units: GTKS20/HMZ, GTKS20/BG, GTKS20/CA, GTKS20/SV
- Hydrovars are easily fitted to Residential and irrigation systems

ELECTRIC PUMP CONTROL AND PROTECTION SYSTEM

Genyo, the new range of compact electronic devices, pressure/flow switches for control and protection of electric pumps. Genyo is controlled by an electronic counteracting spring system integrated with flow and pressure sensors. Genyo enables automatic control of pump start-up and shutdown based on actual water demand preventing any pressure fluctuations at delivery points with constant operating point. Genyo integrates multiple system controls into a single device. Available in two versions: 8A with three fixed starting pressures (GENYO 8A), and 16A with automatic restart (GENYO 16A)

Genyos are easily fitted to Residential and irrigation systems at a low cost.
